

# The PANACUR FENBENZADOLE Protocol

(This protocol should be accompanied and taken in conjunction with  
The Mebendazole Protocol and The Boron-Borax Protocol)

## Anthelmintic Therapeutic Drugs - What are Anthelmintics?

Anthelmintics or antihelminthics are a group of therapeutic antiparasitic medication that expel parasitic worms and other internal parasites from the body by either stunning or killing them and without causing significant damage to the host.

As surprising as it sounds, there is scientific documented research about the repurposing of these Anthelmintic Therapeutic medication to assist and treat other health issues, and especially their effect on cancer.

This rather tasteless repurposed therapeutic medication has been shown to exhibit [“significant inhibition of tumor growth”](#) when supplemented with vitamins A, D, E, K, and B.

## Introducing Fenbendazole

One Anthelmintic is called Fenbendazole, and research shows that it is a triple-threat to cancer:

**It kills cancer cells in three ways which are significant:**

- 1. It destroys microtubules that sustain the structure of the cancer cell and its ability to divide and multiply rapidly.**
- 2. It interrupts the cancer cells' ability to process sugar, and cancer cells must metabolize sugar in order to survive.**
- 3. It boosts the production of a cancer-killing gene called p53, a gene cancer patients may lack. When p53 becomes mutated or can't keep cancer cells in check, cancer cells can proliferate.**

Fenbendazole is an antiparasitic medication, thus it also works against parasites, which could even be the [origin of some cancers](#).

## Other Research That Supports the Use of Fenbendazole for Cancer

There's another “sister” drug of Fenbendazole, called Mebendazole, another Anthelmintic antiparasitic medication prescribed to treat parasitic worm infections in humans. Mebendazole [has shown promising results](#) for treating cancer ([Lung](#), [Melanoma](#), [Glioblastoma](#), Colon, and other cancers).

## COOPERS PANACUR® 100

### Product Categories:

Anthelmintic

### Species:

Cattle, Deer, Goats, Horses,  
Sheep

A broad-spectrum oral anthelmintic for cattle, deer, horses, sheep and goats.

### Active Ingredients

Contains 100g/L Fenbendazole

### Dosage:

1ml / 20 kg of body weight

### Protocol:

**Step 1 - Take one dose daily for three days consecutive.**  
**Step 2 - Stop for four days consecutive.**

Repeat Step 1 and 2.

### AVAILABLE FROM AG STORES LIKE:

**FARMLANDS**  
**PGG Wrightsons**  
**Horse Supply Centres**

(When question by Saleperson.. always answer that this will be used for horses.)

# Protocol:

## MAINTENANCE DOSAGE GUIDE:

1ml / 20 kg of body weight

### Protocol:

**Step 1: Take one dose daily for three consecutive days**  
**Step 2: Stop for four consecutive days.**

**NOTE: If you suffer any healing crisis symptoms take Charcoal (2-4 capsules a day):**

Charcoal is a pre-eminent detoxifier and when taken on an empty stomach, works its way down into the intestines and activates a blood purification process known as “interstitial dialysis”. Charcoal is available from local pharmacy , Health Food Shop or even the New World Supermarket.

# Cancer Protocol:

## DOSAGE GUIDE:

### FENBENDAZOLE DOSAGE GUIDE

#### Joe Tippens Protocol for Complimentary Cancer Treatment *(the current, modified, stronger version)*

- Panacur Fenbendazole (1ml / 20kg of bodyweight). Take every day once after a fatty meal with no pauses.\*\*
- Vitamin E 800 U/I. Take 1 capsule or other form every day after a meal with no pauses.
- Bio-Available Curcumin 600 mg. Take 1 capsule two times a day after breakfast and lunch with no pauses.
- CBD oil 25 mg. Take 1-2 drops (total ~25 mg) under the tongue every day before sleep.

\*\* Panacur Fenbendazole is practically non-toxic to individuals with no liver or kidney insufficiency. Joe Tippens confirmed that taking fenbendazole 7 days a week is fine.

#### Joe Tippens Protocol for Complimentary Cancer Treatment *(the original version)*

- Panacur Fenbendazole (1ml / 20kg of bodyweight). Take once a day after a fatty meal.\* Then take no fenbendazole for four days. Repeat this cycle every week.
- Vitamin E 800 U/I. Take 1 capsule or other form one time a day after a meal with no pauses.
- Bio-Available Curcumin 600 mg. Take 1 capsule two times a day after breakfast and lunch with no pauses.
- CBD oil 25 mg. Take 1-2 drops (total ~25 mg) under the tongue every day before sleep.

\* Panacur Fenbendazole is really hydrophobic and is poorly absorbed from the intestinal tract. Panacur fenbendazole is practically non-toxic to individuals with no liver or kidney insufficiency. Taking it with or after a meal improves absorption.

#### Preventing Cancer relapse – Prophylactic Protocol

- Panacur Fenbendazole (1ml / 20kg of bodyweight). Take once a day after a fatty meal.\* Then take no fenbendazole for four days. Repeat this cycle every week.
- Vitamin E 800 U/I. Take 1 capsule or other form every day after a meal with no pauses.
- Bio-Available Curcumin 600 mg. Take 1 capsule two times a day after breakfast and lunch with no pauses.
- CBD oil 25 mg. Take 1-2 drops (total ~25 mg) under the tongue every day before sleep.
- Tumor marker regular checks every couple of months, regular yearly cancer imaging tests. If there is no cancer relapse after 5 years, decrease the frequency of tests.

#### Preventing Cancer for someone who was always cancer-free – Prophylactic Protocol

- Panacur Fenbendazole (1ml / 20kg of bodyweight). Take once a day after a fatty meal.\* Then take no fenbendazole for four days. Repeat this cycle every week.
- Repeat this cycle for 10 weeks. Stop for 10 weeks. Then repeat the cycle again.
- Vitamin E 800 U/I. Take 1 capsule or other form every day after a meal with no pauses.
- Bio-Available Curcumin 600 mg. Take 1 capsule two times a day after breakfast and lunch with no pauses.
- CBD oil 25 mg. Take 1-2 drops (total ~25 mg) under the tongue every day before sleep.
